Lawsuits, Earthquakes, Fires, Economic Crisis, Droughts, Floods, and Jack-in-The-Box Force Respected News Journal to Flee California

Oakland (API) The **World Headline News** announced today that it is moving its corporate office from Oakland, California to Albany, New York. The Publisher of the **News**, Mark Scott, stated that this difficult decision came "only after extensive, often painful, consideration of a number of factors".

When asked if the California business climate was a factor in his decision, Publisher Scott said, "Only partially. Our current facilities and work environment are near perfect; however, a couple of features are lacking which we truly desire. In order for the **News** to continue its growth, we feel it is necessary to have apprenticeship and community outreach programs. Unfortunately, the Oakland office is not able to provide these programs. In addition, we felt we were significantly under capitalized and were not sure if we could continue meeting our payrolls long term. The new location offers both the apprenticeship and community outreach programs as well as significant long term financing."

Another issue prompting this move was the successful

libel suit brought by Mother "Machine Gun" Theresa (reputed head of the Gambino crime family) against the **News**. The financial judgement against the journal has made it impossible for the **News** to purchase a permanent corporate head-quarters in Oakland. This factor was compounded by the 1989 Loma Prieta earthquake, and the 1991 Oakland Fire, and recent floods which have destroyed the few affordable, clap-trap, death traps under consideration by the **World Headline News**.

However, Publisher Scott has been quoted as saying that,

"the straw that broke the camels back was that I could no longer get a safe and decent meal at a west coast Jack-In-The-Box."

Jack-In-The-Box officials refused comment on this very raw issue.

The Publisher regrets that this decision had to be reached and would like to thank their loyal readers, as well as the BH&L Holding Company which has been so supportive since the founding of the **World Headline News**.

Count von Mark Scott

The Albanian Perspective

A guest editorial by Dr. John Eaton.

Here in Albany, the celebrations continue over the recent news that Albany Medical College is to be razed and the land salted and plowed over. Harry Smith, who has lived across the street from the college for 50 years said "About time they got that bunch of assholes out of there - couldn't sleep because of the howling from the basement". The howling evidently comes from the Dean, Dr. Anthony ('Big Tony') Tartaglia, when he reviews the college budget. Luckily for the staff of Albany Medical College, a new location has now been definitely identified. The college is to move from New York to Oakland, California. Dean Tartaglia said that "We are a teaching hospital and because beginners are likely to make mistakes most of our patients only last a few hours. Consequently, our billing is way down and we need a more reliable source of income." Dean Tartaglia says that he chose Oakland on hearing of discoveries of gold in the area. He is hoping revenues from prospecting will keep the college solvent.

New Hematology Research Laboratory Opens at Albany Medical College

Unique lab is only open at night to better serve the needs of working "stiffs"

Albany (API) Count von Mark Scott has relocated his hematology research program from Oakland, California to Albany. In announcing the recruitment of Count von Scott, Dr. John Eaton, the Director of the Division of Experimental Pathology, said, "It was a real pleasure to finally get some sucker to take this position".

Fleeing the sunshine of California for the darker climate of Albany, Count von Scott said, "I felt that Albany would offer fresh blod to mine research interests". Asked when he would really get his teeth into the meat of his research, Count von Scott would only say it would be after the local Garlic Festival.
